

Style3D | ASSYST

Style3D  
ASSYST

# Our Products

AI technology is applied throughout the entire 3D digital workflow

## Industry Designed Platform

A platform tailored to the apparel industry connecting Mills, Manufacturers, and Brands

## 3D/2D Connect

Pioneering the integration of 3D and 2D in fashion design

## AI Plus

AI technology is integrated throughout the entire digital workflow

## Physics-based Simulation

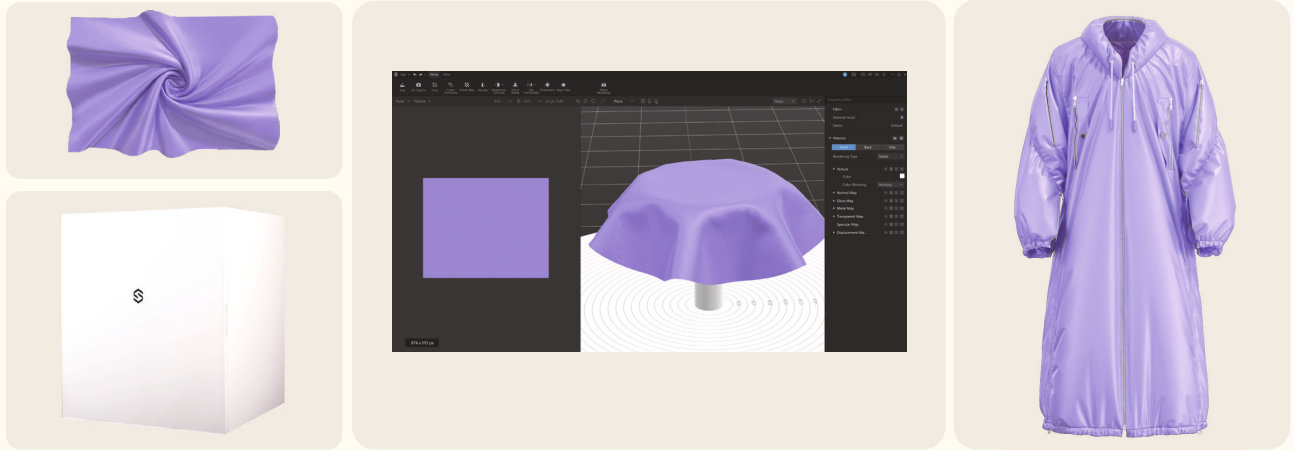

Home-grown physics-based cloth simulation engine runs up to 4 times faster than its counterparts

## Industry Experts and Top Scientists

The team consists of industry experts and top scientists, with years of experience and a global perspective

# Style3D Fabric

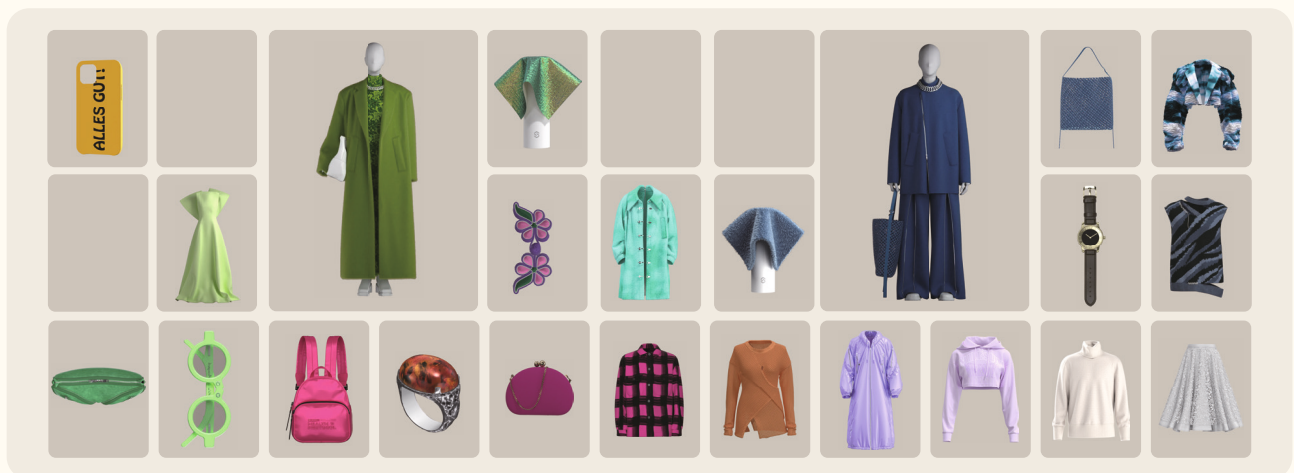

## Fabric Digitalization Workstation

- Rapid, high-quality fabric digitization
- Precise capturing of fabric physical properties
- Seamless integration of software and hardware
- Real-time editing and preview of digital fabrics

# Style3D Cloud

## Digital Asset Management Platform

- Assemble assets from multiple sources into one DAM system
- Compatible with most 2D&3D formats
- Integrate DAM into your current workflow
- Connect from Fabric Mills to Manufacturers to Brands

# Style3D Studio

## 3D Garment Modeling and Simulation Software

### Swiftly Visualize Your Designs

3D visualization of fabrics, patterns, and Avatars with real-time editing for stunning garment effects

### AI-Powered Excellence:

#### Effortlessly Enhance Garment and Avatar Realism

Utilize AI tools to authentically recreate model appearances and precisely simulate fabric details

Ray Tracing Rendering

Identify Background

AI-Generated Diagram

### Unveil Stunning Garment Simulation

Utilize tools like real-time rendering to quickly and accurately generate 3D garment visuals.

### Seamlessly Collaborate

Connect with most 2D/3D software, freeing your design creativity.

### Unleash Visual Creativity

Break free from creative constraints and elevate your brand promotion to new heights.

# Style3D iCreate

## AI Fashion Design Generator

**AI Creation:** Let your imagination soar as iCreate harnesses the power of AI to generate styles effortlessly.

From text descriptions to style images, sketches, and even combining images to generate something entirely new, iCreate opens up a world of endless creative possibilities. Plus, with AI-generated fabric designs, the creative journey knows no bounds.

## AI Editing: Fine-tune your creations with precision using iCreate's AI Editing feature.

Swap out individual style elements, experiment with colorways, and explore a spectrum of color palettes for each design. Transform the same garment with different fabrics effortlessly, giving your creations a unique flair with every iteration.

## AI Try-on: Take control of your designs like never before in the AI Try-on.

Customize your models, swap out garments effortlessly, and enjoy unparalleled control and accuracy in every aspect of your creations. With iCreate, the future of fashion is in your hands.

Try-on A

Try-on B

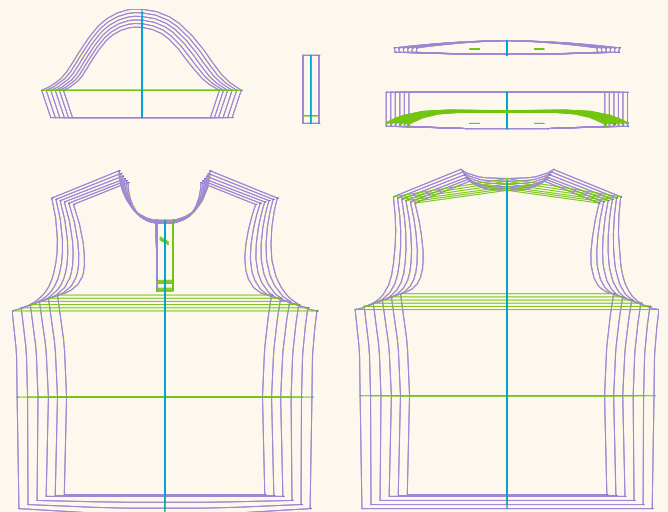

# Assyst.CAD

## 2D Pattern Generation & Grading

Create and modify patterns intuitively ensuring precise fit across all sizes and efficient team collaboration. The comprehensive Smart technology helps you to maintain precision while powerful macros automate routine tasks or pattern making sequences. With an integrated database, all team members can recombine styles with full functionality and all parameters in place.

### 3D Design, Production Ready

Assyst.CAD is directly integrated into Style3D Studio enabling you to synch between CAD pattern and 3D design without any information loss.

# Assyst.Automarker & Assyst.Autocost

## Cut Order Planning & Marker Making

Swiftly go from Assyst.CAD to plotter and cutter with full cost transparency. With just a click, you can automatically lay markers using complex nesting methods and concepts while streamlining order communication to manufacturing partners.

Adding Autocost will enable you to precisely forecast fabric consumption, production costs, and product margins for all orders – at every step of the development process.

# About Style3D | ASSYST

Established in 2015, Style3D pioneers science-based solutions for digital asset creation and collaboration. Our expertise lies in 3D/2D plus AI tools, empowering users to craft, exhibit, and collaborate on cutting-edge digital assets.

Through the acquisition of Assyst, a premier 2D CAD provider, we lead the charge in integrating technology to revolutionize the global fashion industry. Join us in shaping the digital future of fashion with Style3D | ASSYST.
